Danger of aspiration
Rinse mouth with cold water.
Never give an unconscious person anything by mouth.
After first aid treatment immediately seek medical advice.

Notes to a physician

No data available.

05. Fire-fighting measures

Suitable extinguishing media

Water spray jet. Alcohol resistant foam, CO₂, powders, water spray.

Unsuitable extinguishing media

Never use a full-power water jet to prevent fire from dispersing and spreading.

Special risk posed by the substance or by the actual mixture, its combustion products or gases discharged

In case of fire, harmful vapors may be generated: Carbon monoxide. Carbon dioxide.

Special protective equipment

When extinguishing fires, use breathing apparatus with an independent source of air.

Additional information

Cool endangered containers with water in case of fire.
Do not allow the quenching water into the sewage system.

06. Accidental release measures

Personal precautions

Refer to protective measures listed in sections 7 and 8.

Environmental precautions

Do not allow discharge into bodies of water, the soil or the sewage system.

Methods for cleaning up/collecting

Contain and collect spillage with non-combustible absorbent materials, e.g. sand, earth, vermiculite, diatomaceous earth and place in container for disposal according to local regulations (see section 13). Remove according to regulations.

Additional information

Keep away from ignition sources on account of the organic solvent content and air room well. Do not inhale vapours. Provide for sufficient ventilation.

07. Handling and storage

Information for safe handling

Avoid contact with skin and eyes.
Normal precautions taken when handling chemicals should be observed.

Information about protection against explosions and fires

Protect liquid against evaporation. Vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air.
Take precautionary measures against static discharges. Keep away from ignition sources and provide for good ventilation. Electrical facilities must comply with the Explosion Protection Standard.

Ignition group : T3

Flammable class : B

Requirements to be met by storerooms and containers

Containers which are opened must be carefully resealed and kept upright to prevent leakage.
Store in an area with solvent resistant flooring or on a drip pan, so that the groundwater will remain unaffected if a leak occurs. Other special storage requirements, such as support walls for example, are to be determined by the user, subject to the amount being stored.

Information about separation of incompatible products

Keep away from strong oxidising agents.

Further information about storage conditions

Store containers tightly closed in a cool well ventilated place.

Personal protective equipment

Respiratory protection

Provide adequate ventilation. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good general extraction. If these are not sufficient to maintain concentrations of particulates and solvent vapour below the OEL (=Occupational Exposure Limit) , suitable respiratory protection must be worn. Filter: Filter model A1. Can be used up to a maximum concentration of 1000 ppm.
Refer to breathing protection instruction sheet.

Hand protection

Solvent-resistant protective gloves according EN 420 and EN 374 part 1 - 3 must be worn.
Gloves, for example butyl rubber,
Thick (mm): 0,7
